PROFILE

I'm a dedicated and passionate developer with 5 years of experience in software development. I spent 2.5 years in React Native, both as a full-time developer and freelancer. Subsequently, I worked for 2.5 years in a company specializing in interior 3D design software.

Now, I'm eager to return to mobile development, particularly in React Native. I'm actively seeking opportunities to apply my skills, learn from new challenges, and contribute as a dedicated developer.

WORK EXPERIENCE

Software Engineer

Navigram technologies

2021-Present

- Developed functionality using Navigram's internal 3D scripting language, VCL, to enhance the product. This included creating features such as measuring functions and cabinet configuration tools.
- Utilized JavaScript to build modules, including a linear division module that automatically calculated shelf placements in cabinets based on user-defined input.
- Worked on the front-end using HTML, CSS, UIKit, and JavaScript to implement user interface (UI) features, enhancing the user experience of the product.
- Employed PHP to build server-side maintenance tools for configuring user files and managing the download and upload of drawings.
- Utilized Docker to set up and maintain test servers, allowing for local application testing and development with minimal commands.
- Designed and implemented a compiler to convert VCLX scripting language into JavaScript-like syntax, improving the flexibility and interoperability of the product.

React Native Developer

Agence Digitale FCPO

2020-2021

- Developed multiple mobile applications using React Native in various domains, including taxi services, food delivery, sports, and e-commerce. This involved the end-to-end development process, from design to deployment.
- Created and published an NPM package, a React Native component that allows for interactive world maps with clickable continents. This package provided the capability to configure colors and callback functions for each continent.

React Native Developer

Freelance

2019-2020

- Successfully delivered and launched a diverse range of mobile applications, demonstrating adaptability and expertise in React Native development

Vice President Marketing

AIESEC (volunteer)

- Managed a team of nine young individuals implementing comprehensive marketing and communication strategies to promote AIESEC programs and initiatives, ensuring alignment with the organization's global vision and goals
