Professional Experience

- Full Stack Developer | Full-time** **March 2021 - Present**
H2C Development, Nador, Morocco
 - Contributed to the full-stack development of various platforms, such as e-commerce solutions, organization management, and online booking systems, collaborating closely with design teams.
 - Developed dynamic user interfaces using React.js and Angular, integrating interactive components and optimizing the user experience with smooth animations and responsive navigation.
 - Ensured interfaces were fully responsive and adapted to various devices, using CSS Grid, Flexbox, and media query techniques for an optimal user experience.
 - Implemented RESTful APIs with Spring Boot and Java, ensuring security and session management through JWT authentication, OAuth2, and access control for users.
 - Integrated secure online payment solutions, including credit card validation, transaction processing, and recurring payment management through payment gateways like Stripe.
- Full Stack Developer | Intern** **October 2020 - March 2021**
H2C Development, Nador, Morocco
 - Implemented an access control system using React and Node.js, enabling real-time tracking of each badge's status. Developed features to detect and display authorized or denied access.
- Full Stack Developer | Freelance** **May 2020 - October 2020**
LIFETIME DEVELOPERS
 - Collaborated with a freelance team on a MERN Stack project to develop a SaaS application dedicated to managing user subscriptions in sports clubs.
- .NET Developer | Intern** **March 2019 - April 2019**
Descartes Institute of Computer Science, Nador, Morocco
 - Member of a team that developed a new application for the institute using C#.
 - Responsible for hardware setup, application development, database management, and server security.
